English - Advance (2012-2013 Ege University %100 English Preliminary Class Grade : 80/100)

Internship

2019- TPI Kompozit Kanat Sanayi Ticaret A.Ş (Quality Department)

TPI Kompozit Kanat Sanayi A.Ş is a company working in the field of renewable energy and producing wind blades. During my internship, I had the opportunity to learn every stages of the wind turbine production process closely. Since I did my internship in the quality department, I observed the quality control methods used to detect problems in the production process. I have checked the occupational health and safety principles applied in the factory and whether the personnel comply with this.

2020 – I completed my second internship by preparing a report about the Glass and Glassware Industry due to pandemic conditions.

The raw materials required for glass production were determined. glass production flow chart and production stages were investigated. Then, the dangers of the glass production process and the precautions to be taken were determined with the HAZOP and 5*5 matrix risk analysis methods.

My Projects:

2019 Tablet Coating Process

2019 Supply Domestic Hot Water To a House

2019 Thermal Design of a Solar Collector

2020 Methanol Production Process by using CO₂ Hydrogenation (Final Design Project)

2020 Model Compounds of Hemicellulose and Biomass (Diploma Project)

Clubs and Societies

2018- I participated in the activity of vocalization and recording of books for our visually impaired citizens within the scope of the social responsibility project of Ege University.

Certificated Educations

- November 2022 - Hygiene Education for the Food Industry(Bornova Halk Eğitimi Merkezi)

I received hygiene training for those working in the food industry. Since I work in a packaging company that does business with food companies, it is very important that food companies' goods are not contaminated. I learned what can be done in this direction, what precautions can be taken to prevent this problem, and what methods should be followed if this problem has arisen. As a result of the training I received, I succeeded in the exam and was entitled to receive this certificate.

- March 2023- Quality Engineering and Management(Bilginet Akademi)

Thanks to the Integrated Quality Engineering and Management education program; I had detailed information about ISO 9001, ISO 14001 and ISO 45001 management systems. I learned the methods that should be observed and followed in an audit. I learned about QFD, APQP, FMEA, 5N1K, ISHIKAWA(Fishbone), Pareto, Poka Yoke, 5S, Kaizen, Kobetsu Kaizen, Murda Loss Analysis, 6 Sigma quality control methods.

I learned how to read workflow diagrams and brainstorm in a quality control circle. I realized the importance of documentation in a company and how information should be documented. After this training, which consists of 65 videos and many documents, I was successful in the exam I took and was entitled to receive this certificate.

- **May 2023- International ISO 9001:2015 Lead Auditor Education(Bilginet Akademi)**

The purpose of education; To provide them with the necessary competence, knowledge and skills to perform audits according to internationally valid criteria in accordance with ISO 9001:2015 and ISO 19011:2018 standards. It is a training program in which the information needed to develop your expertise and competence required to perform the Quality Management System (QMS) audit is explained in detail. The training program consists of two parts.

In order to implement an effective QMS audit, the basic requirements related to the first part, ISO 9001:2015 "Quality Management System" and the second part, ISO 19011 "Management System Audit Guide" are included in this training program.

- **September 2023- International ISO 22000:2018 Lead Auditor Education(Bilginet Akademi)**

Within the scope of the training program; Planning, execution, reporting of ISO 22000 Food Safety Management System audits, benefits of applying the standard, conditions for becoming an auditor and auditor responsibility, context of the organization, leadership, food safety policy, planning of the food safety management system, operational planning, control, performance control and prerequisites. is taking. In addition, standard items such as food safety hazards, control plans, legal and other requirements, management review, details of the requirements and all the details about what needs to be done are included.

There are prepared a comprehensive and understandable training program for everyone from beginners to professionals who are new to the 22000 Food Safety System Standard. As determined by the standard, the information required for the establishment, implementation and continuous improvement of the food safety system in organizations is included in a scenario.

- **July 2023 - International ISO 45001:2018 Lead Auditor Education(Bilginet Akademi)**

Occupational health and safety ISO 45001:2018 Occupational Health and Safety Chief Auditor training covers activities to protect not only the employee, but also the workplace where he works, the organizations he is affiliated with and the environment where the work is carried out.

ISO 45001:2018 Occupational Health and Safety Chief Auditor training aims to ensure that an organization's occupational safety hazards and risks have been identified, plans are made to minimize these risks and hazards, and the risks are within the acceptable legal framework. In addition, even if the institution has taken the necessary precautions, it will still have demonstrated that it has the competence and plan to act in an organized manner in undesirable situations that may arise, in line with these standards.

- **June 2023 - Project Management and Grant/Funding Resources Education(Bilginet Akademi)**

Project Management and Grant/Fund Sources Education is a training program that will enable individuals who want to prepare projects and manage resources correctly, get a new job or want to specialize in this field to become professional.

Projects, which are a set of activities planned to achieve clearly defined goals within a certain period of time, with a certain budget, consist of more than one phase and must be prepared professionally as they cover more than one area. In project applications, it requires adherence to certain rules and procedures and the operation of an appropriate reporting system. It is important that resources are used correctly and completely. Project Management and Grant/Fund Sources Education is a PMI-compliant training program where you can learn and apply the project management process and resources in detail.

- **July 2023 - Project Writing Education(Bilginet Akademi)**

Project Writing Education is a training program that will enable individuals who want to prepare projects and manage resources correctly, get a new job or want to specialize in this field to become professional.

Project Writing Education aims to teach management processes, knowledge areas, standards, tools and techniques to individuals who aim to gain in-depth knowledge about project writing and specialize in the project field in the sector.

- **September 2023 - Stress Management Education(Bilginet Akademi)**

The aim of the education is to enable people to know themselves more closely and to manage the factors that cause stress in them correctly. It also helps them create more peaceful and comfortable living conditions by ensuring that they stay away from stress as much as possible. Sharing information about prevention efforts by revealing the main causes of stress, ensuring effectiveness through interactive participation on the management of stress processes and the methods and techniques by which the causes of stress can be eliminated, and increasing the knowledge and skill levels of employees in coping with stress.

With Stress Management Education, physical, behavioral and psychological structures are brought under control. At the end of our stress management training program; Stress is invalidated by taking precautions to respond to the stress that begins in the body and mind.

- **June 2023 - Fit Breath Coaching Education(Bilginet Academy)**

It is a program prepared taking into account the integrity of soul-body-mind. Fit Breath Coaching Program is designed under these 3 main headings with information and exercises that touch people's lives, are practical, easily applicable and lead to results quickly. It is a coaching program that creates visible awareness and transformations in people's lives in a very short time.

Breath coaching is a training that enables individuals to achieve top results in their business and private lives by increasing their performance at healthy, social and economic levels. As a result of the coaching process, clients improve their learning capacity, increase their personal performance and improve their quality of life.

>> And now, I am searching the proper programs to get a certificate for International ISO 14001:2015 Lead Auditor Education. Also I intend to have an education about ERP(SAP) Programming.

Hobbies

I like to be interested in many branches of sport such as basketball, football, volleyball and swimming. I have been a writer in a basketball website in the past years. Also history is one of my special interests. Researching the history of different countries is a wondered point for me.

Driving Licence

I have B class Driving Licence.

Military Situation

In November 2022, I completed my military service by doing paid military service. I have no affiliation with the military.
